EDUCATION

CALICUT UNIVERSITY

Bachelor of Computer Application

Malappuram, Kerala

2021-2024

EXPERIENCE

RISS TECHNOLOGY | MERN-Stack Developer Intern

Calicut, Kerala | Sep 2024 - Jan 2025

Developed and maintained MERN stack web apps, optimizing performance and functionality. Built responsive, mobile-first designs with Tailwind CSS and contributed to full-stack development for seamless integration.

SKILLS

Programming Languages : JavaScript, Html, CSS

Libraries/ Frameworks : React.js, Node.js, Express.js, Next.js, Framer Motion, Tailwind CSS

Tools/ Platform : VS Code, NPM, Netlify, GitHub

Databases : MongoDB

PROJECTS/ OPEN SOURCE

BLUE WAVE WEB APPLICATION github.com/Harispk005/Bluewave

ReactJS, ExpressJS, MongoDB

Full-Stack : Designed a fully functional Blue Wave platform using the MERN stack, providing an organized and efficient system for managing swimming pool bookings, training sessions, competitions, and user interactions.

Backend : Built a secure Express.js backend with role-based access for admins, trainers, and users to manage bookings, training, and competitions.

Admin Module : Developed admin features for managing pools, training programs, and bookings, with trainer assignment capabilities. Enabled user record management, automated ID generation, and secure password handling. Integrated a complaint system for effective communication.

Trainer Module : Implemented features for trainers to track attendance, request leave from admins, share training materials, and respond to user inquiries. Enabled seamless communication between trainers and users, as well as among trainers, ensuring effective collaboration.

User Module : Developed user features for viewing bookings, accessing training materials, and consulting trainers. Integrated Razorpay for secure payments and enabled real-time chat for seamless communication and support.

Database : Designed and managed MongoDB schemas for efficient CRUD operations on user data, bookings, training sessions, complaints, and communication threads.

LIVE PROJECTS

HOMEZEN TRADING AND CONSTRUCTION www.homezentrading.com

NextJS, Tailwind CSS, Framer Motion

Homezen is a fully developed website built with Next.js, Framer Motion, and Tailwind, designed to showcase services such as AC maintenance, installation, sales, and construction. With a responsive design and smooth animations, it effectively highlights the company's expertise and professionalism.
